A multi-sig wallet works the same way as a regular crypto wallet, but requires multiple users' private keys to approve a transaction. For example, a "2-of-3" setup requires two out of three key holders to sign off. This makes multi-sig wallets ideal for businesses, online communities, and shared accounts, reducing unauthorized transactions.

Argentina's Senate Hosts First-Ever Conference on Bitcoin Regulation

[Find out more](#)

For the first time in history, the Argentine Senate has opened its doors to discuss Bitcoin, thanks to the efforts of NGO Bitcoin Argentina. The conference, titled "Bitcoin and its Regulatory Framework," was held this week in the Arturo Illia Hall of the Legislative Palace. Organized by NGO Bitcoin Argentina, the event brought together key political advisors and department heads from various political blocs to explore Bitcoin's potential impact on Argentina's economy and regulatory landscape. This is a key step toward legislative recognition of the crypto ecosystem.
