Arizona is moving closer to creating a state-backed digital asset reserve. Two bills, SB 1373 and SB 1025, cleared the Arizona House Rules Committee on March 24 and are now set for a full vote on the House floor. If passed, these bills would allow the state to establish reserves made up of confiscated digital assets and public funds.

Kazakhstan Proposes to Create a Crypto Bank

Kazakhstan is planning to create a crypto bank to manage digital assets and allow legal cryptocurrency transactions. Mazhilis Deputy Azat Peruashev suggested this idea. He proposed that the National Bank and other financial institutions take part in the project. Further, the prime minister received this demand due to President Kassym-Jomart Tokayev's orders for cryptocurrency law reform. Peruashev affirmed that cryptocurrency functions as an essential component within the worldwide financial structure, while residents of Kazakhstan view it as an investment opportunity.
