With an increase in the difficulty in mining bitcoin, single miners faced a hard time finding the target hash. With a mining pool, miners with average computational power can contribute to mining. Transactions with higher transaction fees have priority. According to the number of hashes calculated by each participant in one second, a range of nonce is provided to each member.

Hong Kong Approves First Broker to Buy and Sell Crypto

[Find out more](#)

Guotai Junan Securities (Hong Kong), a subsidiary of Guotai Junan International, has become the first Chinese mainland brokerage in the Hong Kong Special Administrative Region to receive regulatory approval for offering virtual asset trading services. According to the information, the milestone approval was granted by the Hong Kong Securities and Futures Commission (SFC) on Tuesday. It upgrades the firm's existing Type 1 license, which allows dealing in securities, to now include the provision of crypto trading services under an omnibus account arrangement with SFC-licensed virtual asset platforms.
