Centralized exchanges breach always brings discussions around the importance of self-custody in the crypto space. Self-custody refers to individuals holding and managing their private keys, thereby maintaining full control over their digital assets without relying on third-party services. Not your keys, not your crypto, is a well known saying in crypto space.

The world's richest man has made headlines once again, but this time it's not about rockets or electric cars. Elon Musk announced the formation of the "America Party" following his recent split from President Donald Trump, with the new political movement set to embrace Bitcoin as a core financial principle. The Tesla and SpaceX founder's political venture represents a significant shift in the cryptocurrency landscape. Musk confirmed on social media that the America Party would embrace Bitcoin, responding to supporters who questioned the party's stance on digital assets.
